## Site Verification Services

USIS Healthcare Solutions offers an unmatched suite of services customized to protect your health care program's integrity and detect and deter fraud. These include our expertise in Site Verification Services.

USIS has set the industry standard for operational and program management excellence in site verification services. In 2008, USIS partnered with the first government agency to launch a large-scale site verification initiative; today, that program is considered to be the model for all anti-fraud initiatives.

USIS Healthcare Solutions specializes in site verification services designed to meet the varied needs of health care programs. Our field staff is highly efficient in screening a program's newly enrolling or existing providers/suppliers. We verify the operations of those who comply with the client's requirements, while also identifying those who do not.

### What makes site verification services from USIS Healthcare Solutions the best in the industry?

<b>Secure Mobile Applications</b>	Information is captured in the field and submitted to quality control via smartphone, which reduces cycle times.
<b>Customer Mission Focus</b>	Contract-specific training and dedicated program managers provide clients with both high-quality results and highly responsive service.
<b>Easy-to-read, Comprehensive Reports</b>	Inspectors compile comprehensive reports of inspection which include their findings and make recommendations on whether additional follow-up should be conducted to uncover potential fraud.

In support of our findings, we can provide not only photographs, but also computer-generated sketches of provider facilities. We can create the layout of any facility by assessing details such as the number of floors, aisles, rooms, stairways, doors, windows, etc., then populating that information into our proprietary program which translates the data into a sketch of the building's parameters.

Since every program's needs are different, we work closely with each client to determine the precise information to be captured and develop any forms or job aids required. Our inspectors also receive custom training via a web-based e-learning platform for each contract to ensure high-quality results.

USIS Healthcare Solutions inspectors are located in every U.S. state and territory, in both rural and urban areas. In addition, they are equipped with the latest in secure mobile technology to capture and quickly report essential data. These combined strengths have resulted in an industry-leading average turnaround time of 14 days on cases with a 30-day deadline.

### Choose USIS Healthcare Solutions for our extensive resources and expertise in site verification services

- » Nationwide footprint delivers timely and cost-effective coverage.
- » Proprietary Orion® request management system accommodates multiple contracts.
- » Site visit requests are received through a customer portal and immediately processed through Orion.
- » Visits are automatically assigned to field personnel via smartphones which are equipped to cover all aspects of the site visit. This includes generating contract-specific forms and accepting data for complete documentation.
- » Data file and image file transmission safeguards protect personally identifiable information as well as protected health information.
- » Our proven workflow process and experienced decentralized management ensure quick ramp-up for new contracts.
