

ORION Case Management System™

Secure end-to-end platform for creating and transmitting reports of investigation

ORION is an innovative USIS-developed case management system that enables customers to:

- » Access real-time case status information via our secure customer portal.
- » Create comprehensive case documents securely.
- » Eliminate the need to upload documents from a word processing system.

Not only is ORION scalable, it is also adaptive and extensible to government systems. In addition, it provides transparency to the investigative process by supplying program-level dashboards for easy reference to performance period reports and at-a-glance visibility to case and item-level data.

Streamlined to easily adapt to strategic specifications, ORION has a rigorous software development lifecycle process to promote ongoing customer satisfaction. Data can be viewed and accessed only by those individuals with assigned permission from the customer.

ORION Enterprise Solution™

A flexible framework for interfacing with an external system in a powerful and scalable case management system, including an easily accessible customer portal.

Orion External Connector™

Supports extensibility and portability into government to enhance end-to-end automation.

Orion Case Management System™

Facilitates electronic processing of case data information throughout the investigation lifecycle.

Orion Customer Portal™

Delivers transparency by presenting multiple levels of detail for each investigation through dashboards, reports, and a case tracker.

Key Features:

- » Electronic case ordering
- » Web-based applicant portal for completion of security questionnaires electronically
- » Flexibility to exchange data through web services
- » Real-time access to investigative information and case status
- » Automated follow-up scheduling for requested documentation not received
- » Library of frequently accessed documents
- » Automated electronic case delivery
- » Microsoft .NET & SQL Server Enterprise platform
- » Role-based user experience
- » Ability to manage all field assets
- » Data is encrypted at rest and in transmission
- » Allows customer visibility through integrated customer portal
- » Secure technology platform
- » Integration with COTS and GOTS

USIS invites you to contact us today to learn more about the full suite of ORION services and how they can be your secure end-to-end platform for creating and transmitting reports of investigation.
